CS462 Image Processing Chapter 8 Optical Character Recognition

By Dr. Paween Khoenkaw Computer Science MJU

OCR (optical character recognition) is the recognition of printed or written <u>textcharacter</u>s by a computer. This involves photoscanning of the text character-by-character, analysis of the scanned-in image, and then translation of the character image into character codes, such as ASCII, commonly used in data processing.

- Online OCR

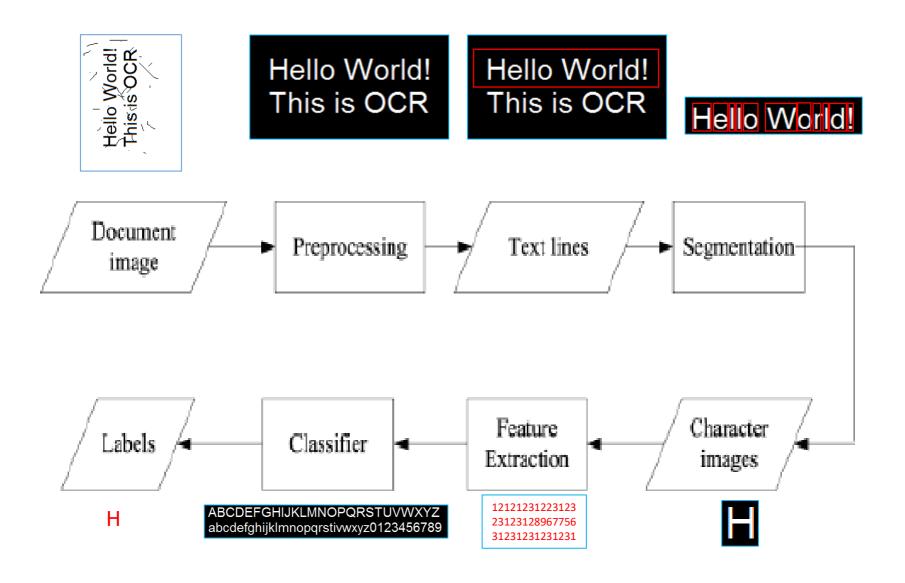

- Accurate
- Simple

- Offline OCR

- Inaccurate
- Complex
